PROFILE

I am a photographer, videographer, graphic designer, and social media content creator. I have always enjoyed creating and filming videos and various forms of lifestyle content, which, in turn, led to my love of filming and making videos on social media and YouTube. My love and interest in photography began in high school, when I worked as an assistant for a professional photography business and became drawn to the field. I second-shoot and help with post-production for various photo shoots and events. I have also done graphics for Savand Photography. I plan to further develop my photography and social media platforms over the years.
